# Why Doing Business in Bulgaria?

Being part of the European Union since 2007 combined with its strategic geographic location on a crossroad between East and West is making Bulgaria a preferable place for doing business in recent decades.

Its constantly developing infrastructure, the promotion of innovation, one of the fastest Internet connections in the world and the growing number of highly profiled IT specialists have given Bulgaria the reputation of the Balkan's Silicon Valley.

Bulgaria welcomes you with the lowest corporate tax rate and one of the lowest labour costs in the whole EU. A tax rate of only 10% and simplified registration procedures is what brings so many businesses here.

It is not mandatory for the founder to be present in the country in order to open business; a legal advisor could be used as a representative.

In our hectic business life two things mean the most for success and business prosperity:

**time**

and

**money**

In Bulgaria these factors work for the businessman. One of the biggest advantages of opening business in Bulgaria is the capital requirement - the minimum capital is 1 Euro.

A registration procedure usually lasts up to 5 working days and if a legal adviser is used, they could be diminished to only 3 days.
